SUMMARY

7+ years of full-time and contract engineering. Founding Engineer at QOOP GmbH since February 2023, sole engineer on a multi-tenant B2B SaaS platform used by ImmoScout24, Mileway, and Formwerk. Specialize in Next.js, TypeScript, Unreal Engine, and real-time systems. Open to Senior, Staff, and Founding Engineer roles.

EXPERIENCE

QOOP GmbH — Founding Engineer

Feb 2023 — Present

Remote (CET overlap)

- Sole engineer on a multi-tenant B2B SaaS platform for the German real estate market.
- Built and operate Flat-Finder, a multi-tenant 3D project explorer for German real estate; dozens of customer projects live in production.
- Designed and shipped a pixel-streamed Unreal Engine pipeline; ran in production for over a year, sunset after cost and UX evaluation.
- Shipped an Unreal Engine SDK enabling non-engineers to author interactive 3D scenes with drag-and-drop behaviors.
- Designed a CMS to manage every aspect of Flat-Finder — content, project data, analytics dashboards, and lead lists.
- Delivered marketplace integrations and co-branded portals with ImmoScout24 and Mileway.
- Architected role-based access control across three tenant tiers (admin, client, end user).
- Owned full stack: product, architecture, infrastructure, observability, and support.

Independent Full-Stack Engineer — Upwork, Fiverr

Dec 2018 — Feb 2023

Remote

- Top-rated full-stack contractor delivering SaaS MVPs, e-commerce platforms, and custom integrations.
- Stack: Next.js, React, Node.js, TypeScript, mobile.
- Maintained 5-star average ratings across enterprise and startup engagements.

SELECTED PROJECTS

Flat-Finder — Multi-tenant B2B SaaS in production at QOOP.

Dozens of customer projects live.

Banikh — Multi-tenant e-commerce SaaS for Bangladesh.

5 payment gateways, 3 couriers, SEO audits, RFM segmentation, A/B testing, and SMS cart recovery.

Rebutly — AI-scored debate platform with structured LLM output.

Schema-validated retries and judging pipeline.

GreenCalc — Solar ROI calculator.

Integrates NASA POWER, Open-Meteo, and NREL PVWatts APIs.

Mac Cleaner — Open-source native Swift macOS cleanup utility.

Available on GitHub.

SKILLS

Languages

TypeScript · JavaScript · Rust · Elixir · Swift · SQL · C++

Frameworks

Next.js · React · Node.js · Phoenix · Unreal Engine

Infrastructure

Cloudflare · Hetzner · Coolify · Docker · PostgreSQL · Redis

Practices

Multi-tenant SaaS · real-time systems · pixel streaming · RBAC · observability · CI/CD
